FROZEN CRYSTAL WATER

Distilled Water 3 hours in the Devi bottle

Before drinking the water for the first time, it is recommended to leave it in the bottle for at least 24 hours.

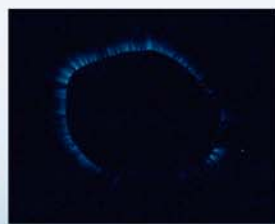

It makes sense never to completely empty the bottle so that the old water can restructure and replenish more quickly.

Water loves to be moved. Shake the bottle before drinking. This activates the Water molecules.

Devi Bottle

Harmonizes the Molecular Structure
Raises the Vibrational Level
of Water

- Blue glass which absorbs the life force of the sun
- The Golden Ratio combined in the print
- Structured Sound Frequencies held in the glass
- Symbiosis of numbers, mantras and sacred symbols

These unique design elements give the Devi Bottle the power to reconfigure and harmonize the Water's molecular structure and raise its' overall energy level. Both factors are essential for perfect functioning of our physical, energetic, emotional and mental bodies.

Harmonize the Water
Harmonize yourself

Harmonize yourself

In nature, rivers and streams always flow through smooth courses that maintain and balance the energy and structure of the Water. Our current water supply systems are designed with unnatural right angles destroying the Water's structure, decomposing it with each turn. In addition, it must withstand the harmful chemicals of the disinfection process.

Science has shown that the molecular structure of Water is able to record the vibrations of sounds, colors, shapes, words, emotions and even thoughts. It varies its' energy level according to the information it receives and then returns it.
